

Solar System donated to SAYA SCHOOL MAIRA AKKU September 2019

Power supply to SAYA SCHOOL MAIRA AKKU was in the past been not ensured and expensive for the school, which is funded by donations. For a long time we had planned to use the very good general conditions for the operation of solar systems and to make the school largely independent of the local electricity supplier with such a system.

In September, the necessary funds were available for a 6.5 kWp solar system. The order to install the system was given to a local company, whose reliability we have known since the cooperation with the solar plant for the SHIMSHAL SCHOOL.

With favorable solar radiation, the system consisting of 12 solar panels, 1 inverter and 4 batteries will be able to almost completely ensure the school's power supply.

THANKS - SCHUKRIA to all donors who made this charity project possible with their donations.
